

On September 22, 2010, with the departure of the Expedition 23 crew, Colonel [Douglas H. Wheelock](#) assumed command of the International Space Station and the Expedition 25 crew. He is also known as [@Astro_Wheels](#) on twitter, where he has been tweeting pictures to his followers since he arrived at the space station. We thought that we should put some of them together as a tribute to him and the whole ISS crew. The images bring breathtaking views from our only off planet Vista point. The following pictures are all visible on Astro_Wheels' [twitpic account](#) and for these we are eternally grateful to him for sharing these with the world. The captions are all his own words. **[29 Pictures]** *If you like this page also check our latest follow up to @Astro_Wheels photos. Check the Triggerpit article: [More ISS photos from space poet & NASA astronaut Wheelock](#)*
